

Blast Powercore Louvers and Snoots

Glare? What glare? Now you can put the light where you want it, with these unobtrusive, one-piece egg crate louvers and top hats. These accessories slide over the body of any current Blast Powercore fixture, and fix securely in place.

For Use with:

Philips Color Kinetics Color Blast Powercore
 Philips Color Kinetics eW Blast Powercore
 Philips Color Kinetics iW Blast Powercore

Designed for any Architectural or commercial lighting application, indoors or out, these accessories provide control of glare and scatter in every situation.

The **Egg Crate Louver** provides 45 degree cutoff, and the louver vanes run between the LEDs, so no light is lost. A new addition, the **Honeycomb Louver**, does the same, but with a flat black 3/4"/19mm aluminum honeycomb louver.

The **Top Hat** has a 3.25"/83mm snoot, cutting

down spill light, even with wide angle lenses. And now there's a **Half Hat** too, with an asymmetric cutoff to eliminate top spill.

Any of these accessories may be used to retain a **Tempest Blast Powercore Lens** — see the *Blast Lens data sheet* for details of *Tempest holographic lenses*.

All these accessories can be securely installed in a few moments, using a hex key included with each one.

| Part Number | Description | ✓ |
|-------------|-------------------------------|---|
