

CycBlaze™

Now you can wash your cyclorama with vivid, intense colors and tints, using the new Blaze TRX™ 5-color LED fixture from Philips Color Kinetics, and Tempest's revolutionary CycBlaze kit. CycBlaze allows you to focus two Blaze fixtures on your cyclorama, using different spread lenses for upper and lower, giving unbeatable coverage at high intensity.

CycBlaze kits include:

- CycBlaze Chassis and Hardware
- Tubular Steel Yoke, molded Locking Knob

CycBlaze is designed to be used with 2 Philips Color Kinetics 24" Blaze TRX fixtures manufactured after November 2010. Fixtures must be purchased separately.

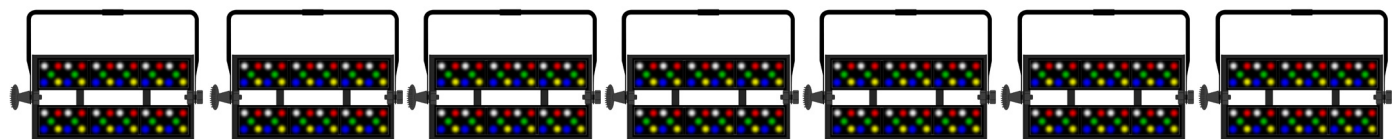

CycBlaze is an add-on kit that supports two Blaze TRX 24" fixtures, and comes with link cables for power and DMX.

Assembly is easy, using simple hand tools. The Blaze fixtures bolt onto the CycBlaze chassis, allowing individual horizontal adjustment.

Blaze fixtures are available in RGBAW (5-color), white, and Intelligent White. Details at www.colorkinetics.com.

Your cyclorama never looked so good - and with Cyc-Blaze you free up dimmers and save energy too.
