

Graze Masks

Now you see me - now you don't! Graze Masks do just that - masking the entire front face of the fixture and eliminating lateral glare. Graze Masks are finished in brushed, chemically plated aluminum, and may be painted if desired.

For Use with:
 Philips Color Kinetics Color Graze Powercore
 Philips Color Kinetics eW Graze Powercore

Graze Masks are exactly the same length as the Graze fixtures, and may therefore be used in continuous runs, with minimal visible joins. The masks are shipped with flat-headed mounting screws, and have a silver brushed aluminum finish, protected against corrosion by a chemical film plating process. Graze Masks may be used unpainted for an attractive, contemporary look, or painted in without priming to match any color scheme.

Part Number	Description	✓
